Inspector Findings

Inspector: Thomas Rooney

On July 8, 1999, at 9:50 A.M., Cathy Ragland, SCAQMD Inspector, and I met with Bill Woysner, Environmental Specialist, to conduct the RECLAIM audit of the facility.

The facility produces commercial and residential floor tiles. The facility limit is one million pounds of material processed per day through the facility.

Between 10:00 A.M. and 12:30 A.M., we conducted an audit of the calculations and the reported values for 1998. The facility uses a program provided by the Gas Company for calculating and reporting emissions to the SCAQMD. The audit showed close agreement between the reported values and calculated values. The calculated values showed 4,315 pounds of NOx while the reported value was 4,320 pounds of NOx.

After 13:00 P.M., Mr. Woysner escorted Cathy Ragland and me on a tour of the facility.

The gas meter at the boiler, large RECLAIM source, had a reading of 365497. Gas meter readings for the process units indicated the following readings. Meter 35406 indicated 288373; meter 13250 showed 034186; meter 11553 indicated 88875.

On Line #2, residential tile, the ink usage is less than two gallons per day.

The facility has a storage area for Armstrong Adhesive S-575. The facility does not produce any adhesives but ships this material with the Armstrong commercial tile to customers which require both materials.

The baghouses, (C4, C5, C19, C30, C32, C34, C35, C36, C132, C133, C135, C136, C137, C149, C150, C151), were all working properly. Baghouse, C19, the static pressure indicator was hard to read because of the access and height of the instrument.

We departed at 15:40 P.M.

Inspector's Signature: *Thomas Rooney* Date: 7-16-99
